## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of the Group I invention and the species of Figure 5 in Paper No. 3 is acknowledged.
2. Claims 37-42 and 4-8, 10-18, 22-26, 28-36 and 43-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, respectively, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

In addition to claims 11-18, and 28-49, claims 4-8, 10 and 22-26 are also withdrawn because the elected species of Figure 5 does not show such structure, i.e. fibers, superabsorbents, etc.

### *Specification*

#### *Drawings*

3. The drawings are objected to because in Figure 5, 151 should be 155. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### *Description*

4. The abstract of the disclosure is objected to because the legal terminology, i.e. "comprises" on line 7, should be avoided. Correction is required. See MPEP § 608.01(b).

Art Unit: 3761

5. The use of the trademark LYCRA(R)(pages 12 and 18), AHCOVEL(R)(page 15), GLUCOPAN(R)(page 15) has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Trademarks should be in all capital letters or accompanied by the trademark symbol but not both.

6. The disclosure is objected to because of the following informalities: On page 23, line 13, "191" should be --291--.

Appropriate correction is required.

#### ***Claim Language Interpretation***

7. "Liquid impermeable" and "liquid permeable" are defined as set forth on page 6, lines 15-21.

#### ***Claim Objections***

8. Claims 1-3, 9, 19-21 and 27 are objected to because of the following informalities: in claim 1, line 4 and claim 19, line 11, "the wearer's" should be --a wearer's--. In claims 2-3 and 9, line 1, "A" should be --The--. In claims 20-21 and 27, line 1, "Training" should be --The training--. In claim 9, line 3, "the total" should be --a total--. In claim 21, line 4 and claim 27, line 2, "central" should be deleted. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-3, 9, 19-21 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Berg '023.

See, e.g., Berg at Figures 1-3, the first sentence of the abstract, col. 1, lines 13-21, col. 2, lines 47-53 and 61-64, col. 11, lines 9-11, col. 16, lines 50-63, col. 20, lines 18-40, col. 19, lines 47-50, the paragraph bridging cols. 20-21, col. 22, lines 21-49 and 65 et seq, col. 23, lines 11-16 and col. 25, lines 3-18. Therefore the Berg patent teaches an article 20 or training pants, see col. 11, line 11, having a liner 38, a cover 40, a posterior region, an anterior region, a crotch region, a waist opening and leg openings, see, e.g., paragraph bridging cols. 4-5, an absorbent body 42, which body has a first zone 56, a second zone(s) 58, see Figures 1-3, the first zone having a lower absorbent capacity per unit weight than the second zone, see portions cited supra. The article is capable of facilitating flow of liquid from the first zone back through the liner creating a wet feeling, see col. 20, lines 18-31. The Berg patent therefore teaches at least the claimed structure. Applicants also claim the claimed structure being capable of liquid flow back indicating to the wearer the release of liquid into the article. If not already taught explicitly in the portions of Berg cited supra, there is sufficient factual evidence for one to conclude that the similar structure of Berg would also be inherently capable of indicating to the wearer the release

Art Unit: 3761

of liquid into the article due to liquid flow back. With regard to claims 3 and 21, see Figures 2-3. It is noted that the claims do not require the pair of zones be discrete zones, i.e. the pair of zones can be connected with each other.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Rabin, Roman et al and Igaue et al references also teach various zones.
